DELCO MOD ESTIMATOR

Quick Start Guide

portal.delcoelevator.com

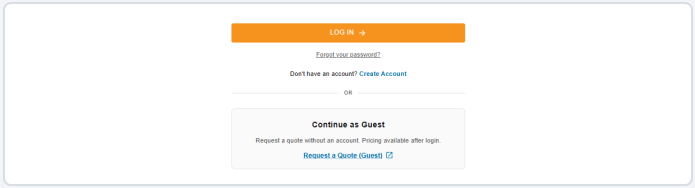
Create a project, configure your elevator and get a preliminary machine quote in six steps.

01 Sign in or continue as guest

Log in with your approved account, or select **Request a Quote (Guest)** to continue without one.

Guests follow the same steps and receive the documents, but prices are not shown. Delco is notified of each guest request.

New accounts and invited team members need Delco approval and activation before they can log in.

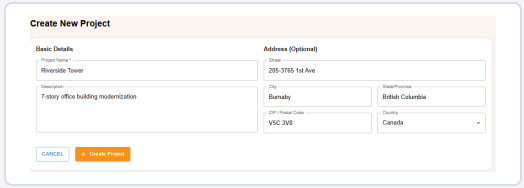


02 Create a project

Select **New Project** on the dashboard or Projects page.

Enter a project name and a short description. Address fields are optional.

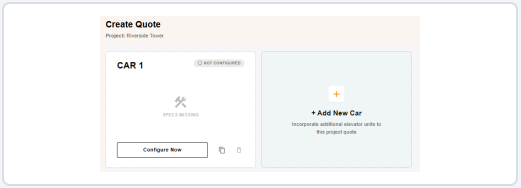
Select **Create Project** to save it.



03 Create a quote

Open the project and select **New Quote**. This creates a new, separate quote under the project.

Select **Configure Now** on Car 1. Use **Add New Car** for each additional elevator in the quote.

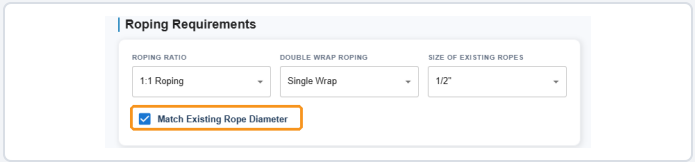


04 Configure the elevator car

Know the machine model? Specify it at the top of the form. Otherwise select **No, help me find the right machine** and complete:

- **Car:** type, location, capacity, speed, voltage, travel distance.
- **Roping:** ratio, wrap and existing rope size. Tick **Match Existing Rope Diameter** if the new machine must match.
- **Emergency brake:** Rope Gripper (support channel only) and its model, or Haider Emergency Brake.
- **Counterbalance:** compensation and counterweight (40–50%).
- **Accessories** (optional): Bedplate, Deflector, Rope Guard, Encoder Cable.

Then select **Save configuration**.

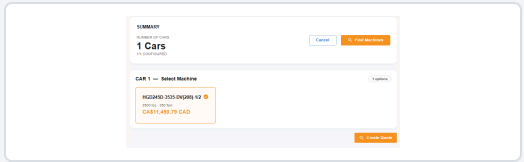


05 Find machines

When every car shows Ready, select **Find Machines**. You see the machines that pass the traction checks, with prices for logged-in users.

Select one machine for each car, then select **Create Quote**.

No match? Your request goes to your Delco account manager, who will contact you with a quote. No further action is needed.

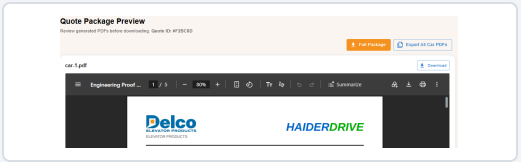


06 Review and download

The **Quote Package Preview** shows the Engineering Proof Report for each car and the Sales Quotation.

Select **Download** for one PDF, **Export All Car PDFs** for the car reports, or **Full Package** for everything.

Guest packages do not include pricing. Registered users can reopen quotes any time from **Quotes**.



This is a preliminary quotation. Final pricing, system design, drawings, and datasheets will be issued upon completion of the machine survey form.
